no

Description:

The 67 m² penthouse is located in the trendy Santa Catalina district in the heart of Palma on the 2nd floor of a beautiful, old town house in a leafy street only 3 minutes from the market halls and shops for (everyday) needs.

The spacious apartment with lots of charm and old details has a spacious living room with balcony and a high ceiling with stucco.

It also has a very nice, bright bedroom with balcony and view of the avenue, another bedroom with two single beds, a bathroom that needs a little renovation and a fully furnished rustic kitchen with a cozy, dining area, sitting area and fireplace.

The penthouse offers various options for remodeling.

The ceiling can be easily opened throughout the apartment to make the wooden beams visible and to make the ceiling even higher.

The staircase can be included in the living room in order to access the wonderful private roof terrace directly above from the apartment.

Enjoy the view over the roofs of the old town and the cathedral.
